

Cubase/Nuendo Standard Nucleus² Profile Setup and Quick Start Guide

Introduction

The first part of this tutorial details how to setup Cubase/Nuendo with your SSL Nucleus². The second part details the commands assigned to the profile.

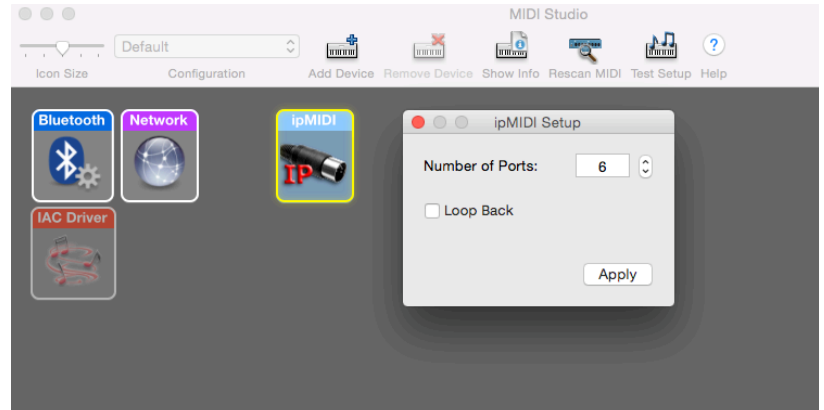

This tutorial assumes you have already installed all the necessary Nucleus² related software on your computer and that there is both a working network and USB connection from your DAW computer to the Nucleus. If you have yet to configure this part of your system, please refer to the Nucleus² Owner's Manual before continuing.

Go to the SSL website › [Nucleus² Product page](#) › [Downloads](#) to make sure your software is all up-to-date.

ipMIDI Setup

Apple Mac OSX

- 1) Close all applications using MIDI
- 2) Open AudioMidi Setup (Applications > Utilities > Audio MIDI Setup)
- 3) Open the MIDI Window (Audio MIDI Setup > Window > Show MIDI Studio)
- 4) Double click the ipMIDI icon
- 5) Set number of ports to 6 and ensure that 'Loopback' is not ticked and then press 'Apply'

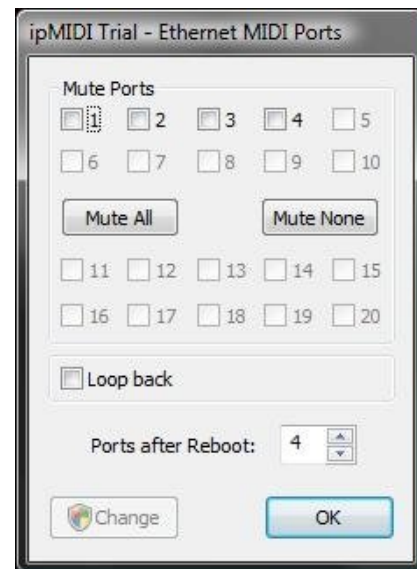

OR

Microsoft Windows OS

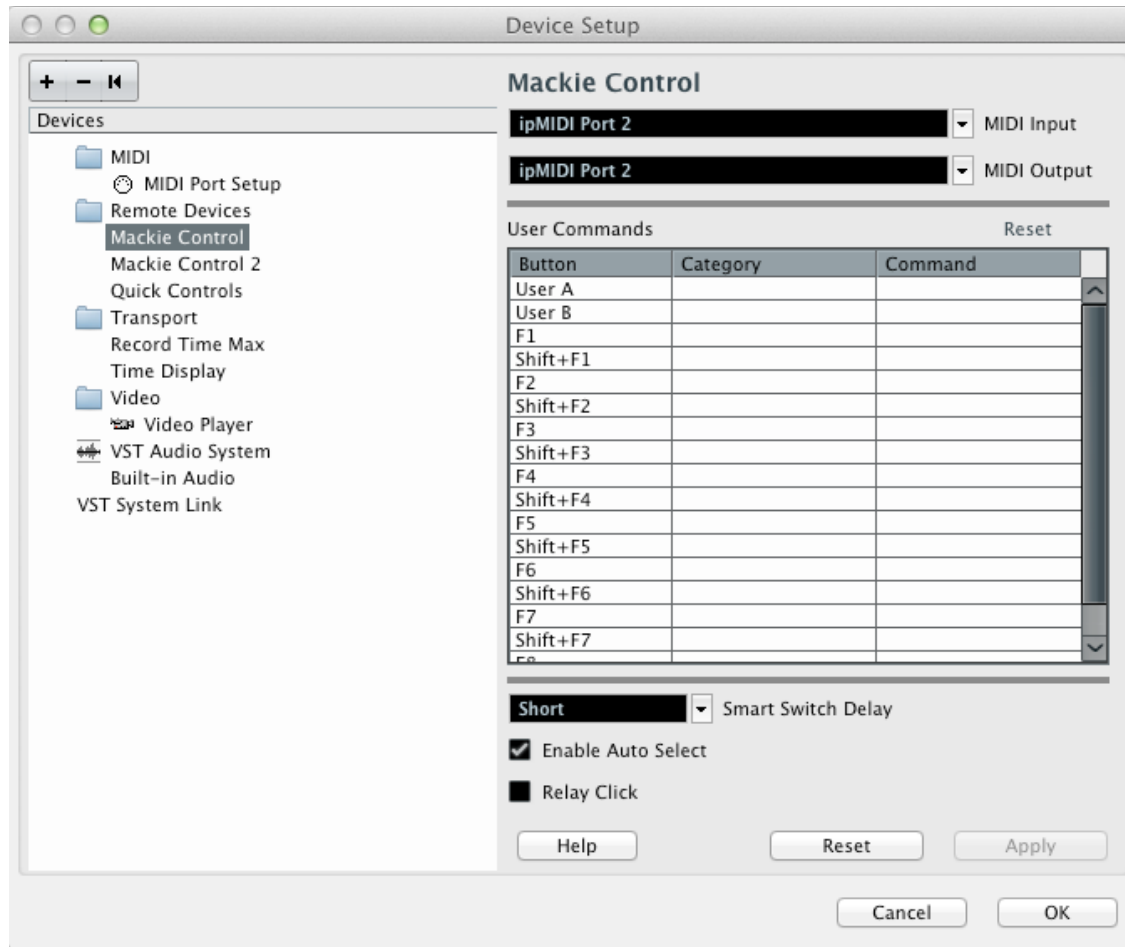

This setup information covers Windows 7, 8, and 10

- 1) Launch the ipMIDI Monitor application
- 2) Ensure Ports 1 to 6 are not muted
- 3) Un-tick 'Loop Back'
- 4) Set 'Ports after Reboot' to 6 and ensure that 'Loopback' is not ticked and then press 'OK'

Note: If you are opening up Ports for the first time, after Rebooting your computer, these will be 'muted'. Be sure to open ipMIDI back up and untick the muted Ports

Setting up Cubase/Nuendo

Device Setup

Control surfaces are setup in Cubase/Nuendo in the Devices>Device Setup>Remote Devices menu. In this example we will setup Cubase/Nuendo for operation on DAW layer 1 of Nucleus².

- 1) Click the '+' button to add a new device
- 2) Choose 'Mackie Control'
- 3) Set MIDI Input to ipMIDI Port 2 and then set MIDI Output to ipMIDI Port 2 also and click 'Apply'.
(Note: Cubase/Nuendo requires you to setup Port 2 before Port 1 for correct operation)
- 4) Again, Click the '+' button to add a second Mackie Control
- 5) Set MIDI Input to ipMIDI Port 1 and then set MIDI Output to ipMIDI Port 1 also and click 'Apply'.
- 6) Press 'OK' to exit this window

Compatibility Mode

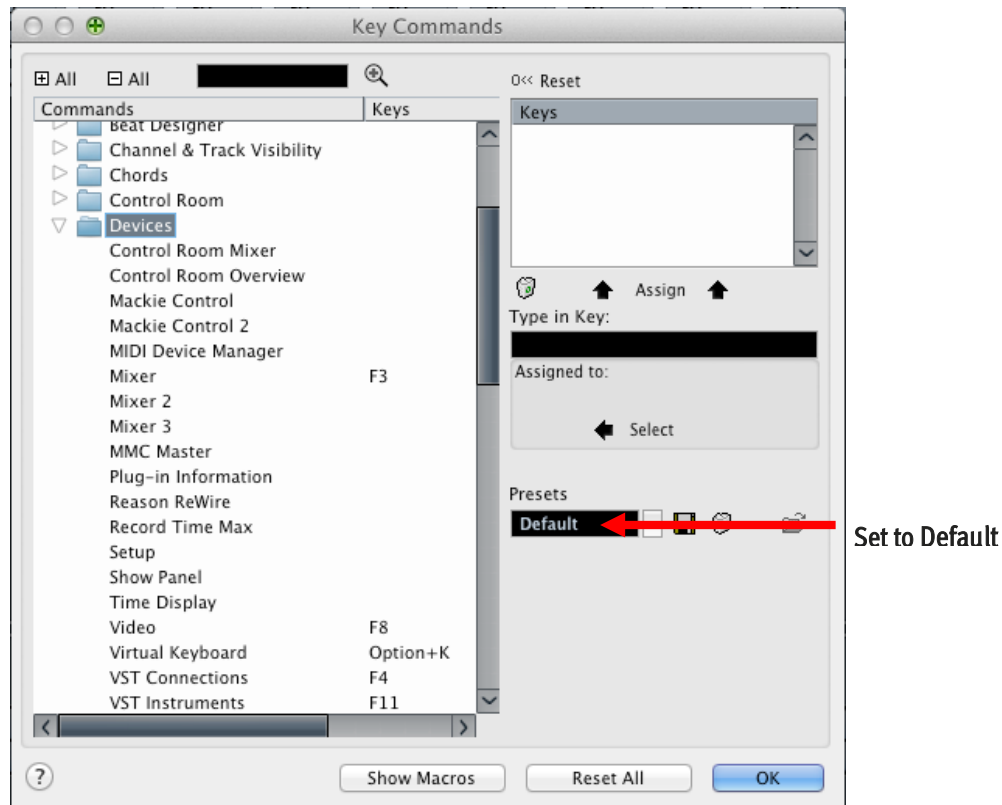

In Cubase 7.5, Steinberg altered certain Mackie Control functions (including Page Up and Page Down), so that they no longer operate as they did before 7.5.

Therefore, in order to make the profile work correctly, if you are running Cubase 7.5 or above please ensure you have setup the Mackie Control 2 in 'Compatibility' mode. This is set in the Devices menu>Mackie Control 2. A very small drop down box will appear. Change it from 'Cubase' to 'Compatibility'.

Key Commands

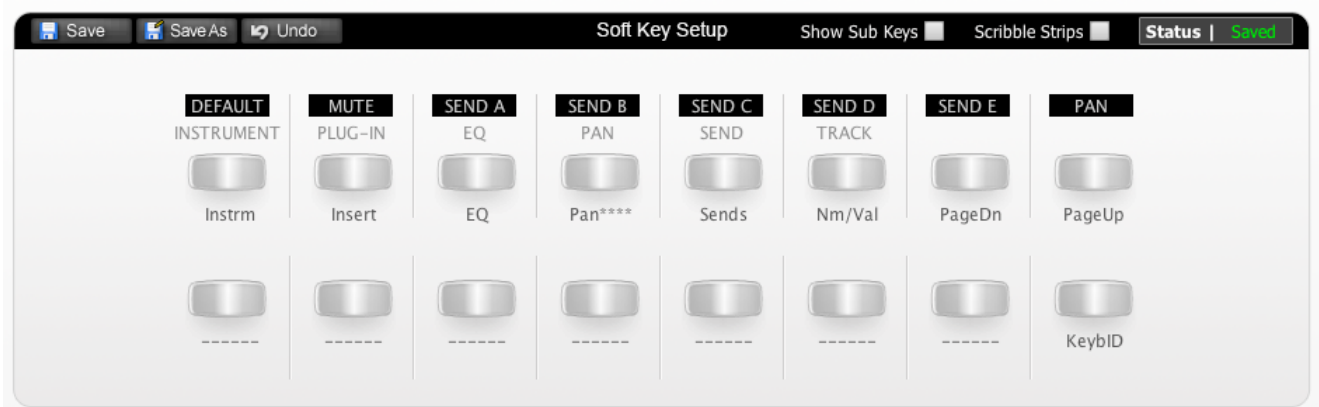

As the Cubase/Nuendo Standard profile contains a mixture of MCU commands and USB Keyboard shortcuts, it is important you set the 'Presets' option in the Key Commands setup to 'Default' so that this profile works correctly. This is set in the File menu > Key Commands...

Nucleus² Setup

Go to the Nucleus² Remote application and ensure the selected profile for DAW 1 is 'Cubase/Nuendo Standard'.
